The RNG uses a well-known algorithm to generate random numbers. The numbers generated by this RNG have passed Marsaglia's "diehard" tests for statistical randomness.

Gamingverse Private Limited has also evaluated card shuffling for single deck without joker.

The shuffling tests were conducted on large enough samples to give the calculations sufficient statistical power.

Gamingverse Private Limited has found that card sequences are unpredictable, non-repeatable and uniformly distributed.

The certified code for the RNG has been fingerprinted.
